3. The organizing parties accept no liability for any eventuality that may occur to affect travel itineraries before, after or during the event, or for any incident or accident, should any occur.

Abstract:

With the emergence of Internet Of Things (IOT) and the proliferation of connected devices, businesses have instant access to information from numerous sources. The huge influx of data creates opportunities for growth and new revenue streams for business across all industries. In the session, our guest speaker from IBM will delve into this trend and how to take this advantage to transform the management of your organization's facilities and assets, so improving operational efficiency and returns of assets. The speaker will also cover case studies of leading organizations across industries that successfully generated real return.

Speaker:

Daniel Kalutkiewicz is Solution Architect of IBM China/Hong Kong Limited with over 15 years in enterprise software solutions specializing in international technical sales and implementations and over years with TRIRIGA and IBM as a client technical professional specializing in RFP responses, proposals, requirements gathering and proof of concept solutions.

Daniel is one of Key speakers at multiple conferences include IBM Pulse, IFMA, NRTA & Advance Energy Conference.
