GUIDED TOUR

Shatin Sewage Treatment Works

Drainage Services Department Shatin Sewage Treatment Works (Shatin STW) is the largest secondary sewage treatment works in Hong Kong. It occupies 28 hectares of land and serves a population of 600,000 in Shatin and Ma On Shan Districts, which produces 250,000 m³ of sewage per day. Shatin STW was commissioned in 1982 and after various stages of extension the treatment capacity of the STW increased to 340,000 m³ per day. The STW has an Information center which serves to enhance the communication with the public, students and professionals from both local and overseas institutions on sewage treatment in Hong Kong.

The Drainage Services Department (DSD) will provide our members an exclusive presentation on drainage treatment process follow by a guided tour. Participants can also enjoy the thematic exhibitions, game booths, stage performance and activities in the "DSD Open Day 2016".
