GUIDED TOUR

The Future of Work : WeWork - Wan Chai office

There will be more changes in workplace experience in the next 5 years than there has been in the last 50 years. The nature of work is changing. Recruitment, retention, innovation, and productivity now require not just coffee, but also yoga, not just printers, but also art installations.

Founded in 2010, WeWork is a global network of workspaces where companies and people grow together. They transform buildings into dynamic environments for creativity, focus, and connection. More than just the best place to work, though, this is a movement toward humanizing work.

Nearly 40,000 companies and more than 256,000 members are now based at WeWork, with member companies ranging from start-ups to household names including Dell, KPMG, GE, Microsoft, and Samsung. More than 70% of WeWork's members collaborate with each other and its international locations serve as convenient bases for business travel, enabling a great degree of work flexibility for both multinationals and small-to-medium-sized businesses alike, as well as options for easy expansion into new markets.
