Technical Visit to Conghua Racecourse and Guangzhou CTF Finance Centre Cum

The 11th Guangzhou International Solar Photovoltaic Exhibition (Guangzhou, PRC) 16 – 18 August 2019

The Hong Kong Association of Energy Engineers (HKAEE) is organizing a Technical Visit to Conghua Racecourse and the Guangzhou Chow Tai Fook (CTF) Finance Centre, these are two newly built development in Greater Bay Area. The visit aims to provide opportunity to our members and industry practitioners to understand the latest standard of building and MEP development and associated sustainable and energy features adopted.

Under the same tour, we will also join the 11th Guangzhou International Solar Photovoltaic Exhibition aiming to understand the latest technology development of solar photovoltaic applications.

The Hong Kong Jockey Club Conghua Racecourse is a world-class facility for the training of Hong Kong's thoroughbred racehorses and opened in August 2019.

Spread across 150 hectares, Conghua Racecourse can house more than 660 active, in-training horses at its current stable capacity. They are assigned to reside in Conghua by their trainers and travel between Sha Tin and Conghua in specially-designed floats. The visit will start from the Visitor Centre for knowing the racecourse development, enjoying trackside viewing and visiting Central Control Room, a few plants including solar hot water system designed for Staff Quarters use. Decent service will be provided.

Note: Some areas in the racecourse requiring quarantine, visitors will normally not be allowed to enter.

The Guangzhou Chow Tai Fook (CTF) Finance Centre

Completed in 2016, the 110-storey, 530m high Chow Tai Fook Centre Tower ranks as the tallest building in Guangzhou, second tallest in China, and fifth tallest worldwide. It is a landmark mixed-use development including offices, shopping mall and hotel in the city's Central Business District with a GFA of 510,000 sq. m.

Design of the buildings vertical transportation systems which stand out as one of the world's fastest vertical transportation system that is capable of reaching speeds of 72 km/h (20 m/s). Energy efficient features include high performance building envelope, multiple energy centres, heat recovery chillers, air-side-free cooling, CO₂ fresh air control, etc.,

The client representative would share about the experience and practical difficulties encountered to implement continual energy savings in this super high rise building.

The 11th Guangzhou International Solar Photovoltaic Exhibition

The exhibition is one of the largest and most influential PV trade shows in China, PV Guangzhou 2019 is going to expand its show floor to 40,000 sq. m, with 600 quality exhibitors displaying state-of-the-art PV technology!

Moreover, the show will be held under the same roof as China Int'l Energy Conservation, Energy Storage & Clean Energy Expo, covering other energy options like charging piles, wind energy, batteries, power supplies, bio-energy, and heating technology!
