Programme Highlights

The Wind Power Station was newly installed in Lamma Island.

The key objective of this visit is to understand the operation of Lamma Power Station, which is the nerve system for power supply to Hong Kong & Lamma Island. There will be around 50 mins. walk to and from the wind power station.

Besides, it is a good chance more about the latest form of renewable energy, and understand their strength, limitations, and application in worldwide.

The design of Renewable energy power station installations coping with the architectural design and unique ecosystem would be introduced by the speaker, and to be visualized by the participants by tour around the visit site.
